Subject: FAQ: HR - Rectification of Official Record (Again)

Dear Ms. O'Sullivan,

It seems we have a recurring issue with the integrity of the user data associated with my profile. Specifically, the 'surname' field appears to be corrupted, consistently displaying 'Mark Ricardan' instead of the correct configuration.

This... glitch... has manifested across multiple system outputs, including, but not limited to, case reports, agenda documents, and various internal communications packets. Frankly, the propagation level is quite impressive for a simple spelling error.

Could someone please action a correction? The required data string is: R-I-O-R-D-A-N. Mark Riordan.

Although in our line of work it can be contested, but could we perhaps make a concerted effort to ensure the official records reflect reality? Just a thought.

Regards,

Mark Riordan
